Full-stack software development, Git & Github, Agile, JavaScript, AJAX, React.js, jQuery, Debugging, REST APIs, AWS, Wordpress, Object-Oriented programming in PHP, HTML5, CSS, Ruby, Ruby on Rails, Python, Django, SASS/SCSS, Vue.js, Bootstrap, Laravel, Tailwind, MySQL

Professional Experience

.Net/Full Stack Developer
ASRC Federal, Remote - 7/2024 to Present

- Develop and maintain RESTful API endpoints across multiple .NET frameworks, ensuring high performance and scalability
- Implement thorough unit testing and leverage Swagger for API documentation and validation, reducing bugs and improving dev handoff
- Collaborate closely with QA engineers to diagnose, track, and resolve software defects, accelerating release cycles and improving product reliability

Software Developer
Maiden Voyage Software, Logan, UT - 11/2021 to 7/2024

- Built and maintained full-stack web applications utilizing the Laravel PHP Framework, Vue.js, Tailwind, and MySQL, working both on legacy codebases as well as new projects
- Maintained projects and their documentation, using self-documenting code, unit tests, and debugging skills
- Onboarded and mentored new hires to encourage good code practice, including source and version tooling with Github
- Interacted with and derived regular feedback from clients to improve development
- Lead a team in an Agile environment to build high quality code, fix problems, and implement new features in a timely manner

Web Developer
Agent Elite, San Diego, CA - 12/2019 to 8/2021

- Built and modified numerous Wordpress themes and plugins using PHP, JQuery, HTML, CSS, Bootstrap, and MySQL
- Maintained and added to the code base of several systems, from Wordpress installs to Laravel applications
- Worked with various APIs from services such as Salesforce on large scale projects

Education

Bachelors of Science in Computer Science
Utah State University, Logan, UT - 8/2021 to 5/2024

Full Stack Web Development Certificate
LEARN Academy, San Diego, CA - 6/2019 to 9/2019
